

Delivering Excellence

Conference & Events

Status AV believes in delivering the best possible solution for every client, and in ensuring the attendees leave the event motivated, excited and inspired.

We will make sure that your event has the best quality equipment, suited to the venue and the style of the event, operated by technical crew who are experts in their fields. Whether it's a roadshow, seminar or awards ceremony, we will take care to get it right first time. Our creativity will shine through on every event, but we will make absolutely certain that the look of the event matches your goal expectations.

On receiving a brief we will plot the event, in exact scale, in our 3D modelling software, which will allow you to get a real feel for the actual look of your event before the day. Changes can then be made and seen straight away on the model, so that on the day there are no unforeseen events.

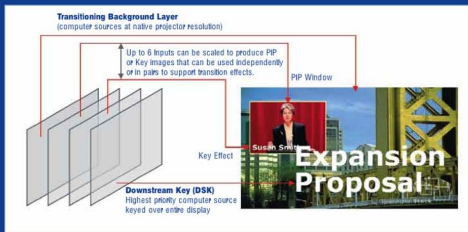

During the event, our job is to make sure, you, the client, has no reason to worry about the technical side, as it will flow smoothly and exactly as briefed, even when there are last minute changes. Our experience in live events means that we are capable of delivering a perfect event for you every time.

Widescreen Projection Canvas

We specialise in widescreen projection canvas using multiple projectors to project an image that can be as wide as you like! The whole canvas is one seamless picture onto which you can project moving backgrounds, Powerpoint, video or camera feeds. Each source can be moved around and resized, all in real time, to give you an amazing experience. Once seen, never forgotten!

The flexibility of the system means that we can tailor the look to your specific event needs. Whether it's an awards ceremony, a product launch or a daytime conference, we can create the look that enhances your message, not overpowers it.

Our experienced PowerPoint programmers can either adapt your own designs or produce completely fresh ones to match the theme of the event.

Widescreen Options

When space is at a premium, our widescreen processing can be used on seamless plasma walls to give an astonishing detailed image without the larger footprint of a projected screen.

These screens can be mounted in a variety of shapes to give ultimate flexibility to your event.

Project Management

The key to any event is efficient organisation with an ability to adapt to changing circumstances. We have the ability to take your event from concept to completion with the minimum of effort and stress for you, the client.

Our project management skills cover not only the essentials of event production i.e. Projection, Lighting, Sound and Staging, but also include the ability to manage areas you may not of thought of:

- Powerpoint development
- Graphics
- Autocue
- Voting systems
- Congress systems
- Interpreters
- Sign language
- Scripting assistance
- Web casting
- Video or audio recording

However complex your requirements we can ensure your event really delivers!

Audio Visual Hire

Our hire fleet is composed of brand new top end equipment that is renewed regularly, ensuring you will never be left with old battered equipment for your event.

Service is at the core of our hire business and every component of your hire experience will be as easy as we can make it.

We provide free delivery, collection, set-up and tuition to all of our local clients.

Installations

If you're looking for a top quality installation service, by trained engineers, at a competitive price, then get in touch. We are in the process of installing a range of equipment, from a simple audio reinforcement project, to a multifloor high definition video and audio commission.

Our range of dealerships cover all aspects of technical delivery for any size audiovisual installation, and our years of experience mean we know how to specify equipment that will best suit your needs

Please contact us anytime to get a competitive quote, that will add real value to your business.
